Walk the dog,
don't just watch the
dog walk.

Making Smart Choices from MyPyramid's Food Groups

Grains: Make Half Your Grains Whole

What's in the Grains group: Any food made from wheat, rice, oats, cornmeal, barley or another cereal grain. "Whole grains" include whole-wheat flour, bulgur (cracked wheat), oatmeal, whole cornmeal and brown rice.

- Get a whole grain head start with oatmeal or whole grain cereal.
- Use whole grains in mixed dishes such as barley in vegetable soup or stews, bulgur in casseroles or brown rice in stir fries.
- Change it up. Make your sandwich on 100% whole-wheat or oatmeal bread. Snack on popcorn or whole grain crackers.

Vegetables: Vary Your Veggies

What's in the Vegetables group: Any vegetable or 100% vegetable juice. Vegetables may be raw or cooked; fresh, frozen, canned or dried/dehydrated.

- It's easy going dark green. Add frozen chopped spinach, collard greens or turnip greens into a pot of soup.
- Swap your usual sandwich side for crunchy broccoli florettes or red pepper strips.
- Microwave a sweet potato for a delicious side dish.

Fruits: Focus on Fruits

What's in the Fruits group: Any fruit or 100% fruit juice. Fruits may be fresh, canned, frozen or dried; and may be whole, cut-up, pureed, raw or cooked.

- Bag some fruit for your morning commute. Toss in an apple to munch with lunch and some raisins to satisfy you at snacktime.
- Buy fresh fruits in season when they taste best and cost less.
- Never be fruitless! Stock up on peaches, pears and apricots canned in fruit juice or frozen so they're always on hand.

Milk: Get Your Calcium-Rich Foods

What's in the Milk group: All fluid milk products and many foods made from milk. Examples include cheese and yogurt. Make your Milk group choices fat-free or low-fat.

Special Tip: Although cream cheese, cream and butter are made from milk, they don't count in the Milk group because they contain little or no calcium. Instead, if you eat these foods, count them as "extra" calories from solid fats.

- Use fat-free or low-fat milk instead of water when you make oatmeal, hot cereals or condensed cream soups, such as cream of tomato.
- Snack on low-fat or fat-free yogurt. Try it as a dip for fruits and veggies and a topper for baked potatoes.
- Order your latte or hot chocolate with fat-free (skim) milk.

Meat & Beans: Go Lean with Protein

What's in the Meat & Beans group: All foods made from beef, pork, poultry, fish, dry beans or peas, eggs, nuts and seeds. Make your meat and poultry choices lean or low-fat.

- Trim visible fat from meat and remove skin from poultry.
- Broil, grill, roast or poach meat, poultry or fish instead of frying.
- Enjoy pinto or kidney beans on a salad or a hearty split pea or lentil soup for extra protein.

Oils—Know Your Fats: Oils are fats that are liquid at room temperature such as canola, corn and olive oils. Mayonnaise and certain salad dressings are made with oils. Nuts, olives, avocados and some fish such as salmon are naturally rich in oils.

Special Tip: Solid fats are different from oils because they are higher in saturated and/or trans fats so they are considered extras. Solid fats are found in whole milk, cheese, higher-fat meats and other foods such as butter, lard, chicken skin and shortening. Some oils such as palm, palm kernel and coconut are also higher in saturated fats.

- Use some vegetable oil instead of butter for cooking and baking.
- Toss salad with salad oil and flavored vinegar.
- Try thin slices of avocado on a sandwich or sprinkle some nuts on a salad.

Separate raw, cooked and ready-to-eat foods while shopping, preparing or storing. Wash hands and surfaces often. Cook to proper temperatures. Refrigerate promptly.

Steps to Get Active

Do Whatever “Moves” You Down Your Personal Path

Finding your right balance between food and physical activity is an important step toward good health. The good news is you don't have to join a gym or be a trained athlete to benefit from physical activity. All the moves you make add up—just get moving.

How Much Physical Activity* Do You Need?

- For good health, MyPyramid recommends at least 30 minutes of physical activity most days, preferably daily.
- To prevent weight gain, many people need about 60 minutes of physical activity on most days.
- To keep off lost pounds, many people need about 60 to 90 minutes of physical activity daily.
- Children and adolescents need 60 minutes of physical activity daily, or most days.

* For health benefits, physical activity should be moderate to vigorous in intensity.

To get started and stick with it, choose activities you enjoy that work for you and your lifestyle. Pick from the small steps below or make up your own moves.

- If you've been out of action for a while, start with a 10-minute walk and gradually add more minutes over time. You may want to check with your doctor first.
- Activity is as close as your own backyard. Cut grass, pull weeds, rake leaves or wash your car.
- Make TV time count. Stretch, lift weights or pedal a stationary bike while you watch.
- Workout at work! Replace a coffee break with a brisk 10-minute walk. Go solo for some “alone time” or recruit a co-worker for moral support.
- Mix it up. Walk one day, swim the next. On weekends, bike, dance or play basketball. You'll get fit while you have fun.
- Park once, shop twice. When you're at a large shopping plaza, park centrally and walk to all your destinations rather than driving to each new location.
- Play with your kids. Kick a ball, shoot some hoops, jump rope or ride bikes.

What about Treats, Sweets and Drinks?

Budgeting Calories for Once-in-a-While Foods

Your daily “calorie budget” is based on your age, gender and physical activity level. For good health, MyPyramid recommends spending most of your calorie budget on choices from the five food groups that supply the most vitamins, minerals and other nutrients and the fewest calories from solid fats and added sugars.

Depending on which foods you choose, how much you eat and how active you are, you may have some “extra” calories left over in your budget.

Special tip: Step carefully!

- Most people have just a small amount of extra calories to spend. (Usually 100-300 calories per day. Visit <http://www.mypyramid.gov> to determine how many extra calories you have per day.)
- Portion sizes are key especially for once-in-a-while foods such as treats, sweets and drinks.

Maximizing “Extra Calories”

If you regularly...

- Get physical activity;
- Choose forms of foods and beverages that are lower in calories, solid fats and/or added sugars;

...then you occasionally can

- Eat more foods from any food group;
- Add some higher-calorie forms of foods or beverages—those that contain solid fats or added sugars;
- Add fats or sugars to foods, such as sauces, salad dressings, butter or syrup;
- Consume foods or drinks that contain mostly fats or caloric sweeteners, such as some snacks and soft drinks.

MyPyramid.gov — Making the Most of Your Visit

• MyPyramid Plan

- Type in your age and select your gender and activity level to get an estimate of your daily calorie needs and how much food you should eat from each MyPyramid food group.

• MyPyramid Tracker

- Type in the foods you eat and your physical activity level to receive personal information on your diet quality and physical activity status.

• Inside MyPyramid

- Look here for in-depth information about physical activity and the MyPyramid food groups, including what's found in each group, recommended amounts and easy tips for following MyPyramid.

• Tips and Resources

- Check this area for tips and resources about food and physical activity and a worksheet to track what you're eating.

This brochure provides information about healthful eating and physical activity for people 2 years and older.

New to the Internet?

Start Surfing with These Tips:

Check out the public library. Most provide Internet access and will help you get started. Some libraries offer basic workshops on how to use the computer.

Ask a friend or neighbor for help. Most people enjoy being the "expert" and sharing what they know.

Turn to a Web-savvy teen for some "surfing lessons."
